ON-LINE	The inverter is on-line at all times to ensure the load is fully protected.
ECONOMY	The load is powered from the bypass. If the mains deviate outside tolerance, the load is transferred to inverter. When the mains return within tolerance, the load is re-transferred to bypass.
SMART ACTIVE	The UPS decides whether to operate in economy or on-line mode depending upon the quality of the mains supply.
STANDBY-OFF	The load is not powered until a mains failure occurs, at which time the load is powered by the inverter using battery power.
